RE: Broadband Lifeline Rate

Lifeline and Link Up Reform and Modernization, WC Docket No. 11-42

Telecommunications Carriers Eligible for Universal Service Support, WC Docket No. 09-197

Connect America Fund, WC Docket No. 10-90

Dear Chairman Wheeler, Commissioner Clyburn, Commissioner Pai, Commissioner Rosenworcel, and Commissioner O'Rielly:

I am pleased to submit this letter in support of the California Emerging Technology Fund. Closing the Digital Divide is one of the most powerful strategies to help the next generation succeed in a competitive global economy. Access to affordable high-speed Internet at home is a vital tool to achieve this goal. I commend the Federal Communications Commission (FCC) for establishing a visionary path to empower all Americans with high-speed Internet access in the National Broadband Plan and we support your announcements to provide a widely-available affordable broadband rate for all low-income households through a Broadband Lifeline Program.

I know that you understand the importance of technology today to empower low-income residents in working class neighborhoods. More than 20% of all California households remain offline and in this digital age are being left behind at an accelerating pace—increasingly being disenfranchised from the democracy itself because so much government information and so many public services are online. According to the 2015 Annual Survey on broadband adoption in California (sponsored by the California Emerging Technology Fund and conducted by the Field Research Corporation), the digital divide persists for underserved communities with large percentages of households not connected at home—35% of low-income households (under \$20,000 annual income); 30% of Latino families (37% for Spanish-speaking households); and 41% of people with disabilities. The Los Angeles Unified School District's student population is

RE: Board Member Mónica García Letter to the FCC re Broadband Lifeline Program

comprised of 73% Latino students and 93% of our English Language Learners live in Spanish speaking households. In addition, 75% of LAUSD students require free or reduced lunch, many of them are also in need of internet access in the home in order to supplement instruction received in the classroom. This data illustrates two of the largest variables when discussing the digital divide in California. Increasingly, participation in daily life requires broadband access at home—job and college applications, school homework, healthcare coverage, workforce training, and education scholarships.

I also know that it takes a “trusted messenger” to reach offline households. Research shows that there are 3 primary barriers to broadband adoption: (1) cost; (2) relevance; and (3) digital literacy. An effective Broadband Lifeline Program must provide dedicated funding for community-based organizations (CBOs), schools and libraries to assist providers with in-language and in-culture outreach, digital literacy training, and sign-ups for subscriptions to successfully close the Digital Divide. Further, there must be transparency and accountability to achieve tangible results.

Therefore, I respectfully urge you to support a successful Broadband Lifeline Program that includes:

- An affordable high-speed Internet service plan for all low-income households offered by and through all broadband providers (in the \$10/month range) with sufficient speeds and a wireless modem for compatibility with school-issued devices. A Broadband Lifeline Program should augment Telephone Lifeline and not force consumers to choose between the two necessary technologies and programs.
- An independent fund to support community-based organizations (CBOs), schools and libraries (as “trusted messengers”) through performance-based grants to assist in enrolling eligible low-income households and participate in true public-private partnerships.
- An oversight advisory body to ensure transparency and accountability with a broad base of stakeholders and community leaders knowledgeable about broadband adoption.

I embrace the goal in the National Broadband Plan “to create a high-performance America—a more productive, creative, efficient America in which affordable broadband is available everywhere and everyone has the means and skills to use valuable broadband applications.” You have the opportunity to significantly move towards achieving this goal by enacting a workable Broadband Lifeline Program. I urge your bold action and we welcome the opportunity to work together to get all Californians and all Americans online.

In the spirit of hope,

Mónica García
